

## Chapter 3 Word Problems

- 1) Bob has \$120 and Susan has \$40. Bob spends \$10 a day and Susan saves \$20 a day. When will Bob and Susan have the same amount of money?
- 2) Craig has 42 cups of water and Billy has 18 cups of water. Craig drinks 6 cups a day and Billy drinks 3 cups a day. When will Craig and Billy have the same amount of water?
- 3) Hannah gets paid \$10 an hour for babysitting and has \$100 in her bank account. Sarah gets paid \$15 an hour but does not have any money in her bank account. If neither girl spends money, when will they have the same amount?
- 4) Sandy is collecting stamps. She collects 5 stamps a month and has 24 in her stamp book already. Greg is just starting his collection and collects 8 stamps a month. When will Sandy and Greg have the same number of stamps?
